THE SUMMER SLIDE

Is the regression of math and reading skills students experience during summer break.

Children from low income households are impacted the most.

Library based summer reading programs have helped combat the summer slide and improve student outcomes in the fall.

KIDS WHO READ BEAT SUMMER SLIDE

Studies show that access to books during the summer prevents a drastic loss in reading skill – especially for kids in need.

SOURCES: 1. Change in scores between end-of-year and following year testing as shown by the California Aptitude Test. (Slates, S. L., Alexander, K. L., Entwistle, D. R., & Olson, L. S. (2012). Testimonials

Parents

“My daughter loves to read, and because of story time, she now loves washing clothes. She thinks the laundromat is the library.”

Faculty

“I spent less time getting my kids up to speed after summer vacation this school year. I was so excited that they were ready to learn from the start.”

Community

“Families love that the children have a place to read and play. They were bored before, but now the children love coming.”

Presentations are communication tools that can be used as demonstrations, lectures, speeches, reports, and more. Most of the time, they're presented before an audience. It serves a variety of purposes, making them powerful tools for convincing and teaching.

To create a stunning presentation, it's best to simplify your thoughts. Start with an outline of topics and identify highlights, which can be applied to whatever subject you plan on discussing. You can then organize them into your introduction, your main content, and your conclusion. Make sure you do enough research to support your points. It's also a good idea to pair data with visual aids like charts, graphs, or images. Remember to keep your presentation easy-to-read. Avoid overloading a slide with too many words and choose a color palette that won't distract the audience.
